

Beaver Lakes Estates Home Owner Association (HOA) Board candidate: Stewart Clark

Stewart Clark is a foreman and training developer at Roaring Fork Transportation Authority, and has earned a mechanical engineering degree from Arizona State University. Stewart specializes in teaching and creating training programs for mechanics and industrial control technicians. His teaching curriculum development experience includes working as a full-time instructor for Colorado Mountain College, developing the Applied Engineering department. Stewart has also owned his own contracting business for a decade, and spent eight years as a manager in the energy industry, and worked as an engineer in the United States Navy Nuclear Program.

On paper, Stewart appears to be an office guru with clean fingernails. However, those who know him can attest to his hands-on skills. Stewart's lifetime hobby has been in the garage, restoring vehicles from their engines and transmissions, to their upholstery and paint. His understanding of mechanics goes far beyond the textbook. Currently, Stewart and his Sweetheart of 33 years are building a home from blueprints in Beaver Lakes Estates, and plan to live their full time within the next three years.

Stewart Clark would be a good addition to the Beaver Lakes Estates HOA board. His knowledge of the mechanical world, and experience managing business and personnel, gives him the confidence to confront the challenges of maintaining a mountain neighborhood. Stewart understands that solutions to many challenges come from the cooperation with others in the community, and that cooperation must be spearheaded with honesty and integrity. Similar to all Beaver Lakes neighbors, Stewart wishes to contribute to the needs and responsibilities of the neighborhood.

Please consider Stewart as a valuable candidate for the HOA board.

Sincerely,
Stewart V Clark
